Hyderabad, India

## EXPERIENCE

### Full Stack Web Developer

#### AttainU

10/2019 - Ongoing

1 year of experience in MERN stack technology at AttainU and I am mentoring a group of 13 students, helping them in their assignments and evaluating their tests. I lead 4 projects consisting of 8 people.

## PROJECTS

### Simplify (FE & BE API)

https://simplify-2021.herokuapp.com/

Simplify is a web application which helps to digitalize their daily routine billing from paper to computer with payment gateway on signup, OTP Confirmation through email for resetting password. The main goal of this application is to help users to analyse/track their monthly business, received orders, income etc.

Technologies Used :

Front End : ReactJS, Redux, React-Query,

Back End : NodeJS, ExpressJS, BcryptJs, JWT, MongoDB, NodeMailer.

### Job Portal (FE & BE API)

https://seasonal-jobs.netlify.app/

Job Portal (Part time jobs) is a web application which helps people to reduce the gap between Job Providers and Job Seekers. Jobs related to part time can be posted here, starting from hourly to monthly.

Technologies Used :

Front End : HTML5, CSS3, Bootstrap

Back End : NodeJS, ExpressJS, MongoDB, Nodemailer, JWT, BcryptJs, Cloudinary

### Sticky Notebook(BE)

https://sticky-notebook.herokuapp.com/

This is a full Back End application, where people can make their sticky notes. It's design is made to look like a real sticky notes. It is beautified with different colors that changes for every reload of page.

Technologies Used :

Back End : NodeJS, ExpressJS, BcryptJs, Express-Sessions, HBS, MongoDB
