## EXPERIENCE

### Full Stack Developer (MERN)

#### Codalyze Technologies

09/2020

Codalyze is a service based company. It helps in making full stack web and mobile applications clients. I am working as a full stack developer.

## PROJECTS

### Everest (FE & BE)

Everest is a NextJs application developed for the internal usage for the employees of a company to raise claims and book travel requests and several other purposes which are very important for the daily work routine and to upload it to the online for future reference. MicroService architecture was used in this project.

Technologies Used :

Front End : NextJS, Redux, AntD, Styled Components, AG-Grid.

Back End : NodeJS, ExpressJS, PSQl.

### Networkzen (FE & BE)

NetworkZen is a React web application. This app is used for checking the security level of the ip addresses and giving solutions and patchups according to the security threats. It has subscription plans to the users. Stripe payment method was implemented in this application.

Technologies Used :

Front End : ReactJS, Redux.

Back End : NodeJS, ExpressJS, MongoDV.

### Job Portal (FE & BE API)

<https://seasonal-jobs.netlify.app/>

Job Portal (Part time jobs) is a web application which helps people to reduce the gap between Job Providers and Job Seekers. Jobs related to part time can be posted here, starting from hourly to monthly.

Technologies Used :

Front End : HTML5, CSS3, Bootstrap

Back End : NodeJs, ExpressJs, MongoDB, Nodemailer, JWT, BcryptJs, Cloudinary

## SKILLS

### Front End

ReactJs

NextJs

Redux

JavaScript

HTML5

CSS3

Antd

Bootstrap 4

ES6

SCSS

Styled Components

### Back End

NodeJS

ExpressJS

MongoDB

PostgreSQL

EJS

HBS

Mongoose

Sequelize

Socket.io

JWT

PassportJS

### Cloud

Heroku

Netlify

Cloudinary

MongoAtlas

### Tools

Git

npm

Postman

VS Code

bash

### Programming Languages

JavaScript

Python3

## PROJECTS

---

### Simplify (FE & BE API)

🔗 <https://simplify-2021.herokuapp.com/>

Simplify is a React web application. This app is helpful in digitalizing photographers and editors' routine billing from paper to computer. Razorpay payment gateway is used on signup. OTP Confirmation through email for resetting password. The main goal of this application is to help users to analyse/track their monthly business, received orders, income etc.

Technologies Used :

Front End : ReactJS, Redux, React-Query, React-Router-Dom.

Back End : NodeJS, ExpressJS, Razorpay, BcryptJs, JWT, MongoDB, NodeMailer.

---

### Sticky Notebook(BE)

🔗 <https://sticky-notebook.herokuapp.com/>

This is a full Back End application, where people can make their sticky notes. It's design is made to look like a real sticky notes. It is beautified with different colors that changes for every reload of page.

Technologies Used :

Back End : NodeJS, ExpressJS, BcryptJs, Express-Sessions, HBS, MongoDB

## PUBLICATIONS

---

### Cherry Validator

**NPM**

🔗 <https://www.npmjs.com/package/cherry-validator>

Published cherry-validator npm package. It is a node package which validates email, password and text with custom options. Regex concepts were used in this package.
